ONTARIO SCIENCE CENTRE Science School

2012/2013

Are you a Grade 11 student looking for a challenge?

Become a part of the Ontario Science Centre for a semester of Grade 12!

Earn SCIENCE and MATH credits.

Explore new science and technology.

Be inspired for life.

Benefit from a solid learning experience, including:

GET INSPIRED!

The Ontario Science Centre Science School presents students with an opportunity to gain University Preparation science and mathematics credits during an enriched semester at the Ontario Science Centre. Students acquire a solid academic background in classes that are small and informal with experienced, enthusiastic and imaginative teachers. Science School labs are housed in the heart of the Science Centre.

At the Science School, there is a strong emphasis on the communication of science. Students gain experience in this area through practicum hours spent participating in engaging activities within the Science Centre and the local community. Students must complete a minimum of 15 practicum hours in addition to their coursework. These hours can be counted towards the 40 Community Service Hours required by the Ministry of Education.

Due to these extracurricular commitments, students cannot take more than three courses while at the Science School.

HOW TO APPLY

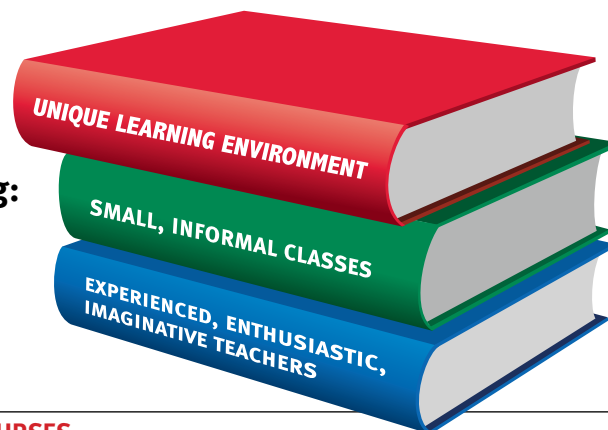

Selection is based on the student's written application, academic record and recommendations from two teachers, one of whom must be a science or mathematics teacher. Final selection may be completed through an interview process.

Up to thirty students from across Ontario are selected for each semester.

Complete applications for the academic year 2012/13 must be received no later than April 5, 2012.

For application forms and more information visit www.OntarioScienceCentre.ca/oscschool

N.B. L'École des sciences est offerte en anglais seulement.

COURSES

Students choose three of the following:

Biology SBI4U, Chemistry SCH4U, Physics SPH4U, Advanced Functions MHF4U (First Semester ONLY), Calculus and Vectors MCV4U (Second Semester ONLY). Students cannot register for courses for which they have previously earned a credit.

COURSE FEES

No tuition fees are required. The program is offered through the Toronto District School Board and Toronto Catholic District School Board. Students will be registered with one of these two school boards while attending the Science School.

HOUSING

Students are responsible for arranging their own accommodation. A list of possible housing options will be provided to students once they have been selected for the program.
