

OUTDOOR SPACES

TELUSCAPE

Glowing LED trees, multi-coloured fibre-optic reeds, and an interactive water maze are just a few of many surprises that await your guests at the 6,600 square metre outdoor exploration plaza, TELUSCAPE. Particularly spectacular on a warm summer night, TELUSCAPE is a space like no other for cocktail receptions or parties. Guests can mingle as they explore its wetland walkways and the installation art piece, *FUNtain*, created by professor and media artist, Steve Mann, or gather around the TELUSCAPE Forum for performances or speeches.

OUTDOOR SPACES

KRG TERRACE

Like many spaces at the Science Centre, this one also has a surprise. After guests have taken in the spacious views of the valley below the Ontario Science Centre, they'll notice *Lotic Meander*, artist Stacy Levy's beautiful representation of a meandering river with carved ebbs and flows. Visitors can walk along this piece of art, experiencing the "river's" stone path and the feel of its carved stream-bed. Enjoy a meal or drinks at this location while looking out on a wide vista and one of the city's largest urban wetlands. The KRG Terrace is adjacent to the Procter & Gamble Great Hall.

GEMINI PATIO

Tented April through October, the Gemini patio provides a perfect indoor-outdoor mix when rented in conjunction with the Gemini Rooms. Particularly beautiful after late spring, when lush greenery abounds, the patio can be a terrific location for a small reception, or a place where colleagues can get up from their seats in the Gemini Rooms and engage in some informal blue-sky brainstorming in the open air. Perfect for a picnic or BBQ.

ADDITIONAL OUTDOOR SPACES

A small outdoor area can also be found beside the Weston Family Innovation Centre. Or take advantage of the convenient location of the patio right beside the Valley Marketplace Restaurant, with easy access to the fun-filled Science Centre Exhibit Halls.
