

Experience the Whole Science Centre

We are built on a ravine. The higher the level number, the further down you go!

Featured Areas

LEVEL 2 **Canada 150: Discovery Way**
This installation highlights notable Canadian inventors, scientists, technological breakthroughs and innovations in honour of Canada 150!

LEVEL 4 **KidSpark**
Spark your child's curiosity through play, building, water and a variety of activities. For children under 8 with their caregivers.

Space
Check out a real Moon rock, a meteorite from Mars and explore the Universe in Toronto's only public planetarium.

LEVEL 5 **A Question of Truth**
Explore how beliefs and biases can influence scientific research.

LEVEL 6 **Weston Family Innovation Centre**
Experiment with sound panels, play with the ferrofluid piano, test the materials orchestra, see your face in bubbles.

The Living Earth
Touch a tornado or wander through a real, live rain forest environment filled with plants and animals.

Science Arcade
Lights, sound, action! Have fun and get physical with physics in our Science Arcade!

The AstraZeneca Human Edge
Explore the wonders and possibilities of the human body.

Forest Lane
Discover Canadian forests in their many forms.

LEVEL 1 Auditorium

More Science!

August 18, 2018 to January 6, 2019

Ever heard of entanglement, superposition or the paradox of Schrödinger's cat? Explore the very small and see how the world works on a scale smaller than you can imagine. Learn about the science that brought you neon lights, lasers, MRI scanners and GPS tracking. Delve into the research stories behind quantum mechanics, information technology, and the future of quantum.

Quantum was created by the Institute for Quantum Computing at the University of Waterloo.

LEVEL 2 Procter & Gamble Great Hall

Step into the world of a story that is still unfolding, in an observatory where a Canadian professor solved the mystery of neutrinos — an enigma that scientists had been trying to unravel for decades. Take a journey deep underground with a virtual tour of the subterranean research facility used to observe the interactions of subatomic particles.

New Eyes on the Universe is owned by SNOLAB and tour managed by Science North.
