Vocabulary**

SCIENCE DOODLE

TOOLS

What you'll need:

- Pens
- Scissors
- Egg timer (optional)
- Scrap paper (reuse!)

Game setup:

1. Cut paper into squares (save full sheets of paper for the doodles)
2. Write one "clue card" word from the list below on each piece of paper
3. Optional: Print the clue cards on page 2

How to play:

1. Give each player some blank pieces of paper and a pen
2. Put clues face down in the middle of your play area
3. Take turns picking up a clue, setting the timer (optional) and drawing (or "doodling") pictures to help your players guess what your word is. You can only draw pictures to help people guess the word on your clue card—no words, letters or talking allowed
4. The first player to guess the correct word keeps the clue card

**The player with the most
clue cards at the end wins!**
